

Example Red Hint Trial

The diagram illustrates a trial sequence. It begins with a plus sign (+) in a box. This is followed by a box containing the word "ROBE" in red. Above this box is a silhouette of a head with a brain, and a thought bubble containing a red "X", indicating that the word "ROBE" is incorrect. This is followed by another plus sign (+) in a box. Next is a noisy image of the word "BIRD". Finally, there is a text input box with the prompt "Type the word you identified:" and the word "Bird" entered in the input field.

If asked to... type the word you identified

Type the word you identified:
